

Golden Aria Corp Enters Clean Water Industry (AUDIO ENCLOSED)

VANCOUVER, British Columbia, Jan 26, 2009 -- Golden Aria Corp. (OTCBB:GLCP) (the "Company" or "Golden Aria") is pleased to announce its expansion of clean energy initiatives now includes solar powered water purification.

Golden Aria has signed a letter of intent with Global Solar Water Power Systems Inc. of Spring Valley, California ("GSWPS"), pursuant to which Golden Aria may acquire up to a 20% equitable ownership interest in GSWPS subject to certain terms and conditions including the following: (i) the Company makes cash payments of up to US\$400,000 to GSWPS; and (ii) the Company issues up to 1,000,000 shares of its common stock. Specific terms are expected to be disclosed if and when a definitive agreement is reached, which is expected to occur before February 19, 2010. Closing of the transactions contemplated in the letter of intent are subject to a number of terms and conditions including the following: receipt of all required regulatory approvals, obtaining all required third party consents, satisfactory completion of due diligence by both parties, receipt of any required financial statements of GSWPS and the entry into a definitive agreement between the parties with customary terms and conditions. There is no assurance that the transaction will be completed as planned or at all.

Golden Aria and GSWPS are also in negotiations whereby Golden Aria may acquire certain rights to market and sell the water purification units. The companies expect to form a strategic relationship for the development, implementation, marketing and distribution of the technology and its applications around the World excluding Iraq.

Snyder says this technology could save the lives of millions;

GSWPS is in the business of developing and manufacturing state of the art portable solar powered trailer mounted water purification units that can be delivered and operated nearly anywhere in the world and can provide a village, resort, or remote work-camps with all their drinking water and domestic water requirements. The technology was developed in 2009 by Mark Snyder, Chief Technology Officer of Golden Aria, and Mark Snyder is the President of GSWPS. Over 300 locations in war-torn Iraq are now benefiting from clean drinking water as a result of the deployment of these systems, which were delivered by others to Iraq during 2009.

Wind turbine powered units are in development for applications in remote locations that do not enjoy sufficient sunlight hours, bringing clean drinking water to all the corners of the world. All the units employ various filtering, membrane and UV technology to deliver potable drinking water.

Mark Snyder explains the process in layperson's terms;

Mark Snyder has been an expert in several areas of alternative energy industries for over 30 years, including acting as a consultant under the Clinton Administration on its Y2K contingency plans. He and his companies have installed over 3,000 solar PV systems over the years and have been involved with the development of several unique clean technology solutions including wind, biomass, biofuels and organic farming.

Golden Aria recently announced its intent to change its name to Enertopia Corporation to better reflect our focus on clean energy and water solutions for our planet.
